

I-10 WEST EXTENSION

TITLE

LIGHT RAIL EXTENSION

TYPE

FACT SHEET / Q2 2025
valleymetro.org/10west

About the Project

The 10-mile I-10 West Extension will connect the greater West Valley to the existing Valley Metro Rail system. This project is unique and will see light rail trains traveling in the median of Interstate 10, before ultimately crossing to the north side of the freeway to a terminus at the existing Desert Sky Transit Center.

A related project, the 1.6-mile single track loop (0.8-mile extension) Capitol Extension, will provide an important connection between the downtown core and the Arizona State Capitol area. For more information on the Capitol Extension project, visit valleymetro.org/CAPEX.

PROJECT STATUS

- The project team is currently in the planning phase working toward an updated Locally Preferred Alternative (LPA) that includes the connection to the Capitol Extension project.

NEXT STEPS

- Valley Metro and City of Phoenix will engage in public outreach in spring 2025 to further define the project, including the connection to the Capitol Extension and station locations.
- The project team will continue outreach and engagement with project area communities and key stakeholders.
- Once the analysis is complete, a recommendation for the connection to the Capitol Extension will be presented to the Phoenix City Council for consideration.
